Past Performance

Trusted to consult and perform testing for projects ranging in size and scope from local Fire Departments to multi-building base-wide initiatives. Latest projects include:

- US Army Corps of Engineers Retro-Commissioning Fort Benning, GA (46 Buildings)
- Starship Trainee Barracks, Ft. Benning, GA
- Naval Construction Battalion Center, Gulf Port, MS (Re-commissioning of 21 Buildings)
- Battle Command Training Center Air Barrier Testing, Ft. Bragg, NC SOF Battalion Ops Center Air Barrier Testing, Ft. Campbell, KY

The Atigun Difference

Atigun's professionally trained and experienced staff provides a range of building envelope testing, auditing and related construction consulting services to the Federal, State and Municipal Government client. Tightening regulations, stricter building codes, higher standards and shrinking government budgets require ever more efficient designs and buildings. Whether you are a general contractor or Government Agency, Atigun wants to partner with you throughout your project. Consulting with Atigun early in the process allows for the incorporation of applicable standards into the design and planning phases of the project. Construction phase mock-up testing and building inspections verify that the design is properly executed and that products are applied in accordance with manufacturer and industry standards. Final building testing by Atigun staff provides the scientific and quantitative verification of the quality of construction for both the owner and contractor.

Competitive Advantage

Atigun is a Service Disabled Veteran Owned Small Business (SDVOSB) in accordance with the size standards for our several NAICS codes and certified under the VA's Vendor Information Portal (VIP). Additionally, we remain cost competitive because

- We are centrally located in the Southeast thereby reducing travel cost and response time
- We own and maintain an extensive line of testing equipment which reduces the needs for rentals and shipping
- We are a lean organization that is customer centric
